

Product Description

2~24 fibers, jelly filled, fiber contained central loose tube

copolymer coated steel tape, two parallel steel wires 1.2mm

PE outer sheath

Water proofing layer between the steel tape and cable core

Double coated PE corrugated steel tape under PE sheath

Parallel double steel wires as strengthen member

Product characteristics:

1. Low dispersion and attenuation
2. Proper design, precise control for fiber excess length and distinct stranding process render the cable excellent mechanical and environmental properties
3. Compact structure and lightness, flexible and good bend-resistant performance
4. Water proofing layer providing strong water-resistance performance
5. Steel tape with PE sheath and metallic strengthen member enhancing anti-crush and tensile property of cable
6. With small cable diameter, light cable weight, self-supporting
7. Operating Temperature: -40 ~ +60 C

Product application:

Laying modes: Aerial & Conduit

Rural communication, local trunk line, CATV & computer networks system

Long distance communication and LAN

Product Advantages:

1. The conductor is made of **Top quality optical fibers**, it has **Low dispersion and attenuation**, ensuring a very good signal and data transmission ability.

2. We are a very **professional cable manufacturer** with advanced production equipments and strict quality inspection system, ensuring the products complying the standard and customized requirement.

3. We have more than **10 years' export experience** and exported products to **more than 60 countries** over the world with a good reputation internationally.

4. We not only offer **good products** and **good service** to our customers, but also try to **develop our staffs**, offer a good training, good working and living conditions to the staffs.

5. Also we are a company with **highly social responsibility**, often take part in public benefits activities, like tree planting, aiding poor students, green environment activities, etc.
